As part of the San Francisco Police Department's commitment to transparency and accountability, and in compliance with San Francisco Administrative Code Chapter 96A, Law Enforcement Reporting Requirements, the third Quarter, (July, August, and September 2017), Use of Force, Arrest and Police Encounters Report has been released and is available on our website.

The report highlights a significant decrease in use of force incidents during this time period and compared to the previous year. Data shows a 32.1 percent decrease in reportable uses of force in comparison to the third quarter of 2016. Year to date, the department saw a 17.8 percent decrease in uses of force compared to 2016. Force was used in one-tenth of one percent (297 incidents) of the department's 193,735 calls for service in the third quarter.

“The data reinforces what we already know- San Francisco police officers’ use of de-escalation and proportionality is enabling safer outcomes for police and community members,” said San Francisco Police Chief William Scott. “Our department’s training emphasizes time and distance and preservation of life principles that ultimately provide guidance to our officers in the use of force.”

Assaults on San Francisco police officers saw a 45 percent decrease in comparison to the third quarter of 2016. As of August 30, 2017, 792 sworn members have completed Crisis Intervention Team (CIT) training, which teaches officers how to effectively manage crises in the field to de-escalate situations and obtain a safe and positive outcome for the officer and the community member.

San Francisco Administrative Code, Chapter 96A requires local law enforcement to publish data relating to the use of force, arrests, and encounters with members of the public. This data is required to be submitted quarterly to the Mayor, the Board of Supervisors, the Police Commission and the Human Rights Commission. The report contains the following information:

Admin Code Chapter 96A.3

(a) For Encounters:

- (1) The total number;
- (2) The total number broken down by race or ethnicity, age, and sex;
- (3) The total number of searches performed broken down by race or ethnicity, age, and sex;
