Quarterly Activity and Data Report Quarter 3, 2022

Background

The Racial and Identity Profiling Act of 2015 (AB953) took effect on January 1, 2016, and requires California law enforcement agencies to collect and report data to the Office of the California Attorney General. The requirements of Assembly Bill 953 include reporting from California cities and police departments on any complaints alleging racial or identity profiling and detailed demographic data for traffic and pedestrian stops.

In 2016, the City and County of San Francisco also passed local legislation to support the police reform efforts of the San Francisco Police Department. The Board of Supervisors voted unanimously on an ordinance that established Administrative Code Sec. 96A (Law Enforcement Reporting Requirements) and specified reporting requirements for the San Francisco Police Department (SFPD). The Quarterly Activity and Data Report (QADR) (previously named the “96A report,” short for the Administrative Code Sec. 96A: Law Enforcement Reporting Requirements) serves to meet the quarterly reporting requirements and includes data pertaining to stops, searches, arrests, use of force and alleged bias-related complaints. Additionally, in Quarter Three of 2020, the Department started conducting occasional in- depth analysis with rotating scope and topic. At the same time, the QADR provided references and discussion of academic research on the topic of disparities in policing. In 2021, SFPD outlined its method and approaches to applying academic research in the field of disparities in policing. The primary mechanisms for these efforts center on policy changes to many Department General Orders and training improvements. That work is ongoing and through the implementation of, and continuous improvement on, Collaborative Reform recommendations, additional academic research, audit and other recommendations from the Police Commission, Department of Police Accountability, and community members, and other best practices.

The data presented in this report are analyzed over time and can be used to evaluate the effectiveness of current police reforms undertaken by the San Francisco Police Department. These data inform analysis on disproportionate contact and can be utilized to inform and improve policies, training, and tactics in policing. This report serves to demonstrate that SFPD is:

- committed to delivering on the values encapsulated by “Safety with Respect,” the Strategic Framework developed from recommendations of the Collaborative Reform Initiative,
- actively seeking and implementing ways to improve transparency and accountability to San Franciscans,

- 
- conducting data reporting recommended by President Obama’s Task Force on 21st Century Policing. and
 - meeting the requirements of the San Francisco Administrative Code Sections 96A (Law Enforcement Reporting Requirements), and 96A.5 (Victim Demographic Reporting) and 96D (Domestic Violence Reporting).

The data included in this report covers the time period: July 1, 2022 – September 30, 2022.

Stop Data Collection and Potential Policy Changes

Over the course of 2022, the San Francisco Police Department, Department of Police Accountability, and Police Commission have been working towards a revision of Department General Order 9.01 – Traffic Enforcement. Key to this discussion is the potential banning of a subset of traffic violations from most enforcement. This data exploration considers five years of stop data collected by the department, along with other data, to provide context to this discussion.

Key Terms:

- 9.01 Selected Stop: A stop listed on the March 2022 Draft of DGO 9.01 as pretextual, and therefore subject to ban, and findable in the data for analysis. (See methodology appendix for more.)
- All other stops: All stops that are NOT on the DGO 9.01 draft list as pretextual AND is in the SDCS data for analysis.
- NAF Driver: Not At Fault Driver – drivers who are logged on the CHP 555 form as a not at fault party in a collision. (See methodology slide for more)

For a complete methodology and list of caveats, see the Technical Appendix to this QADR.

Stop Trends – Count and Reason For Stop, 2018 – 2022

Considering all reasons for stops, traffic and non-traffic, the number of stops has declined from 85.90k in 2019 to around 25.59k in 2021. This is a 71.4% reduction in stops from 2019 to 2021.

Proportionally, the share of traffic violations as reason for stop has fallen from 67.15% of all stops in 2019 to 63.75% in 2021. This is offset by an increase in reasonable suspicion stops as the reason for stop, increasing from 29.28% in 2019 to 32.6% in 2021.

It is likely that the COVID19 pandemic and associated response played a part in the reduction in stop count from 2020 thru 2021.

Note that 2018 and 2022 include only 2 quarters of data each in this analysis and excludes the Airport.

Stops by District and Traffic Violation Code Type

Stops data from Q2 2018 thru Q2 2022 was filtered and sorted to provide insight into how many traffic stops were conducted over that period, along with if the stop was one of the selected stops on the 9.01 list (the gold section of the bar chart) or not on the 9.01 list (the blue section.) Additionally, the data was parsed across the geographic districts available.

From Q2 2018 to Q2 2022, 9.01 selected stops accounted for between 6% and 28% of a particular area's traffic stops.

Bayview district had the highest proportional number of 9.01 selected stops, with 28.48% of all traffic violations in that district being on the 9.01 list. The Richmond district had the lowest, at 6.56%.

Traffic Stops by District and Call for Service Status

These data were then sorted to consider any differences between all traffic stops, selected stops on the 9.01 list, and all other stops not on the 9.01 list, against the stops call for service status. That is – did the officer log that the traffic stop that was conducted was due to a dispatch generated by the Department of Emergency Management in response to a 911 call?

When considering **all stops** from Q2 2018-Q2 2022 and dividing them between calls that were a call for service against calls that were not, a large majority of stops were not the result of a call for service.

Over 94% of all stops at all stations were not calls for service, indicating the stop was an on view or self-initiated stop by the officer.

These data are filtered to only consider stops listed on the 9.01 selected stop list, and then again split between call for service response (y/n), and the district geographies.

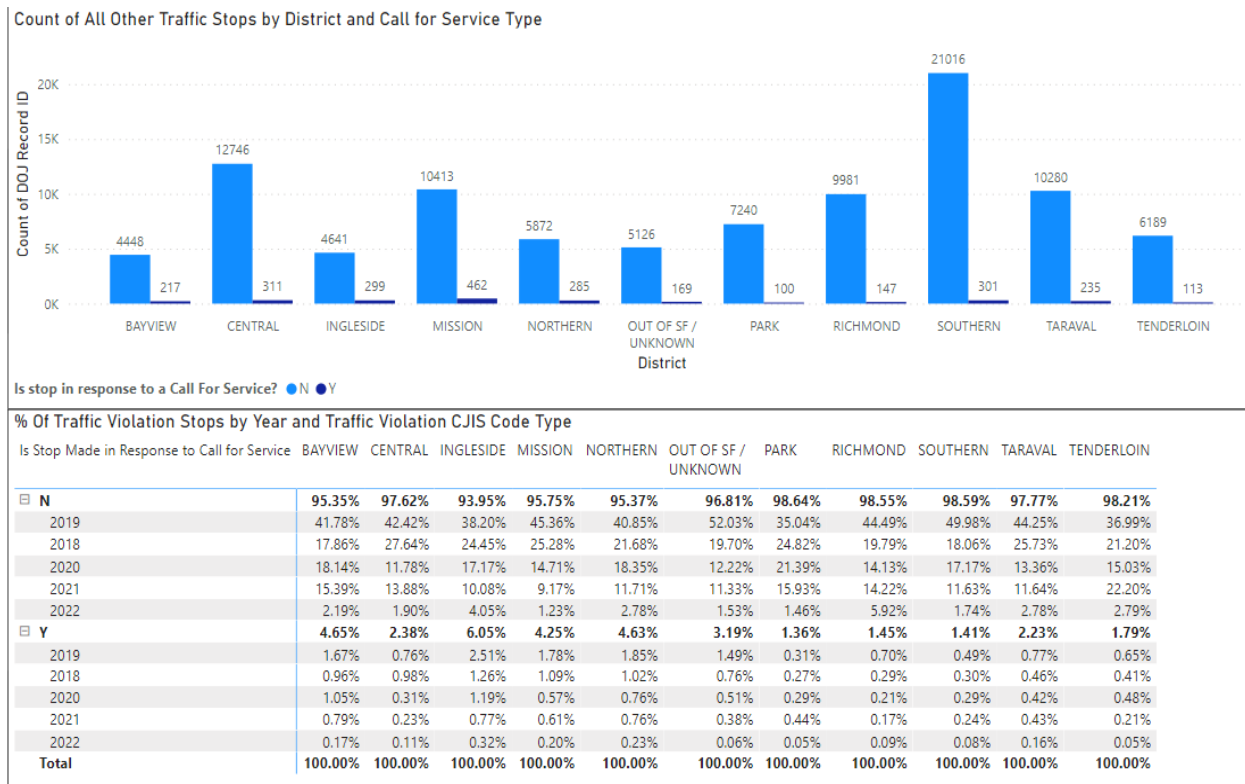

When considering **9.01 selected stops** from Q2 2018-Q2 2022 and dividing them between calls that were a call for service against calls that were not, we see a large majority of stops were not the result of a call for service.

Over 96% of all 9.01 selected stops at all stations were not calls for service, indicating the stop was an on view or self-initiated stop.

Ingleside had the highest percentage of stops on the 9.01 selected stop list with 3.07% over the time period. Bayview had the lowest, at 1.13%.

These data are filtered to consider all traffic stops conducted from Q2 2018 thru Q2 2022 that are not on the 9.01 selected stops list, and then divided by call for service status (y/n) and district geography.

When considering **all other stops** from Q2 2018-Q2 2022 and dividing them between calls that were a call for service against calls that were not, we see a large majority of stops were not the result of a call for service.

Over 93% of all 9.01 selected stops at all stations were not calls for service, indicating the stop was an on view or self initiated stop.

This is slightly lower than the percentage of 9.01 selected stops that are not calls for service (96% vs 93%.) This indicates a slightly higher call for service rate for all other stops as compared to 9.01 selected stops.

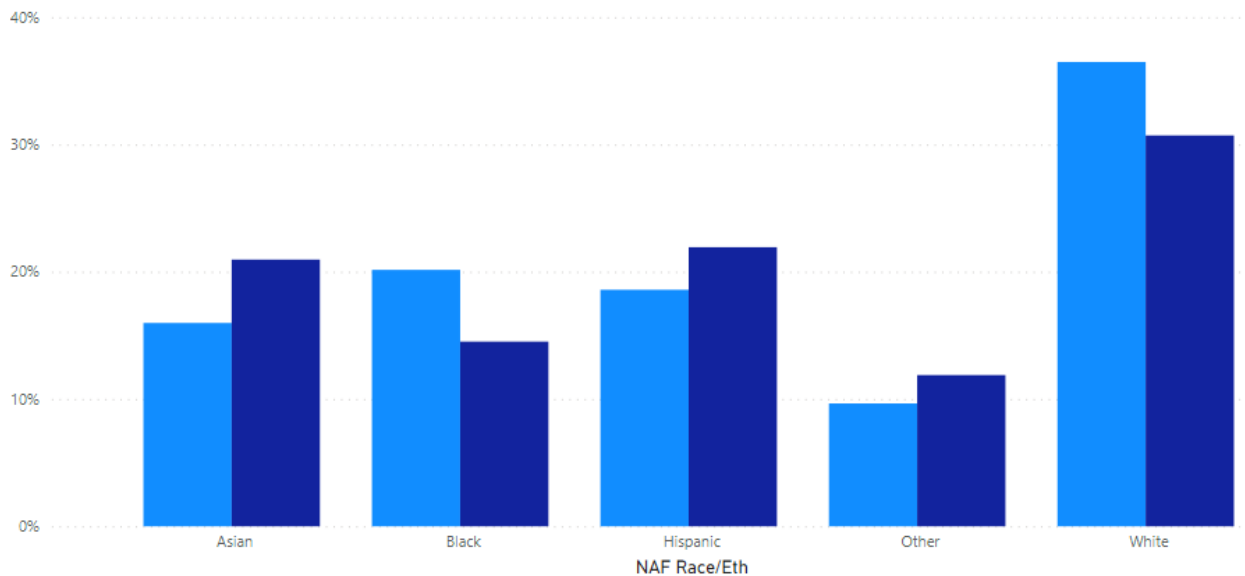

% Stops vs % Not At Fault Driver Comparison

In the below chart and tables, stops data are counted, by percentage of race/ethnicity against all stops in the stops data. These data are then compared to the percentage of the same race/ethnicity's representation in the Statewide Integrated Traffic Records System (SWITRS), a database that captures data associated with individuals involved in significant collisions – to include race/ethnicity data and initial 'at fault' determination.

The existence of the SWITRS data and the not at fault (NAF) datapoint can be leveraged to generate a random sample of individuals driving in San Francisco, by race/ethnicity, over the time period of this data exploration.

% of Stops, by Race/Ethnicity vs % Not At Fault Drivers, 2018-2022

● % Traffic Stops ● % NAF Representation

% of NAF drivers vs % of distinct stops, 2018-2022

Race/Eth	%CT Count of Distinct Stops	%CT Sum NAF Drivers
Asian	15.98%	20.96%
Black	20.15%	14.51%
Hispanic	18.59%	21.93%
Other	9.65%	11.88%
White	36.49%	30.71%
Total	100.00%	100.00%

of NAF drivers vs # of distinct stops, 2018-2022

Race/Eth	Count of Distinct Stops	Count of NAF
Asian	19565	2215
Black	24674	1534
Hispanic	22761	2318
Other	11820	1256
White	44676	3246
Total	122444	10569

A comparison of the percentage of NAF drivers by race/ethnicity against the percentage of drivers **in all traffic stops**, by race/ethnicity, from Q2, 2018 to Q2 2022, finds an over representation of Black individuals in the stop data as compared to the NAF data (20.15% vs 14.51%) and white individuals (36.49% vs 30.71%). It also shows an under

representation of Asian (15.98% vs 20.96%), Hispanic (18.59% vs 21.93%) and 'other' (9.65% vs 11.88%) drivers.

These data are then re-run with all the same parameters, except this time only selected stops on the 9.01 list are included.

% of Selected Stops, by Race/Ethnicity vs % Not At Fault Drivers, 2018-2022

% of NAF drivers vs % of distinct stops , 2018-2022

Race/Eth	%CT Count of Distinct Stops	%CT Sum NAF Drivers
Asian	8.69%	20.96%
Black	38.22%	14.51%
Hispanic	20.65%	21.93%
Other	7.19%	11.88%
White	27.31%	30.71%
Total	100.00%	100.00%

of NAF drivers vs # of distinct stops, 2018-2022

Race/Eth	Count of Distinct Stops	Count of NAF
Asian	1910	2215
Black	8399	1534
Hispanic	4539	2318
Other	1581	1256
White	6003	3246
Total	21978	10569

Leveraging the not at fault (NAF) race/ethnicity data in the SWITRS database as a baseline – a comparison of NAF race or ethnicity against the percentage of **distinct 9.01 selected stops**, by race/ethnicity, both from Q2, 2018 – Q2 2022, the data shows:

An over representation of Black individuals in the stop data as compared to the NAF data (38.22% vs 14.51%)

An under representation of Asian (8.68% vs 20.96%), Hispanic (20.65% vs 21.93%), White (27.31% vs 30.71% and 'other' (7.19% vs 11.88%) in the stop data as compared to the NAF data.

Finally, these data are rerun with similar parameters, but this time only considering all other stops (ie: stops not on the 9.01 selected stop list.)

% of Selected Stops, by Race/Ethnicity vs % Not At Fault Drivers, 2018-2022

● % Traffic Stops ● % NAF Representation

% of NAF drivers vs % of distinct stops , 2018-2022

Race/Eth	%CT Count of Distinct Stops	%CT Sum NAF Drivers
Asian	17.55%	20.96%
Black	16.23%	14.51%
Hispanic	18.13%	21.93%
Other	10.18%	11.88%
White	38.46%	30.71%
Total	100.00%	100.00%

of NAF drivers vs # of distinct stops, 2018-2022

Race/Eth	Count of Distinct Stops	Count of NAF
Asian	17655	2215
Black	16329	1534
Hispanic	18241	2318
Other	10241	1256
White	38687	3246
Total	100591	10569

Leveraging the not at fault (NAF) race/ethnicity data in the SWITRS database as a baseline – a comparison of NAF race or ethnicity against the percentage **of all other stops**, by race ethnicity, both from Q2, 2018 – Q2 2022:

An over representation of Black individuals in the stop data as compared to the NAF data (16.23% vs 14.51%) and white individuals (38.46% vs 30.71%).

An under representation of Asian (17.55% vs 20.96%), Hispanic (18.13% vs 21.93%), and 'other' (10.18% vs 11.88%) in the stop data as compared to the NAF data.

Key Observations

- The volume of stops by the SFPD have dropped significantly over the last 5 years, falling 71.4% from 2019 to 2021, the last two full years of data available for comparison.
- **9.01 selected stops** accounted for between 6% and 28% of any district's traffic stops from Q2 2018 to Q2 2022.
- Leveraging the demographic data in the SWITRS database, we compare % race/ethnicity in the SWITRS data against % race/ethnicity in the stops data and find that black individuals are the most over-represented in 9.01 selected stops data, as compared to other race/ethnicities in the Not At Fault data.

Areas for Future Exploration

Continued exploration and analysis of the data could consider any of the following analyses to continue to inform the policy conversation around DGO 9.01.

- How do 'results of stop' differ between the 9.01 selected stop list and all other stops?
- How does the discovery of any contraband or evidence differ between the 9.01 selected stop list and all other stops?
- What does changing the 9.01 selected stop list to the latest 9.01 Draft version dated 12/14/22 effect the analysis?
- How do local code violations factor into the 9.01 selected stops and all other stop lists, and how do they effect the analysis?

SFPD stands for safety with respect for all.

We will:

- Engage in just, transparent, unbiased, and responsive policing
- Do so in the spirit of dignity and in collaboration with the community
- Maintain and build trust and respect as the guardian of constitutional and human rights

Q3 Overview

During the first quarter of 2022, and over the course of 2021, the City and County of San Francisco issued varying directives regarding the COVID 19 pandemic on changes to shelter in place, vaccination, masking, and business reopening¹. **Data collected during the pandemic and recovery period reflect the unique circumstances of the time. Users should take care when comparing data trends across pandemic response and non-response timeframes.**

¹ [Directives -- COVID-19 Health Directives -- San Francisco Department of Public Health \(sfdph.org\)](#)

Suspects

SUSPECTS OBSERVED AND REPORTED

The suspect information provided includes descriptions that are generated by members of the public or observed by Department members and documented in police incident reports.

DESCRIPTION	Jul	Aug	Sep	Q3 2022	% of Total Suspects Q3 2022
Asian/ Pacific Islander	122	119	125	366	4.5%
Black/ African American	971	1015	1151	3137	38.6%
Hispanic/ Latino	487	425	472	1384	17.0%
Native American	2	5	3	10	0.1%
White	538	522	599	1659	20.4%
Others	510	482	576	1568	19.3%
Total	2,630	2,568	2,926	8,124	100.00%

Total suspects observed and reported in Q3 2022 (8,124) increased by less than 1% from Q3 2021 (8,098). Black/ African Americans accounted for approximately 39% of all suspects observed and reported in Q3-2022.

Note: Subject data is extracted from incident reports via the Person Schema of Crime Data Warehouse via Business Intelligence tools. Search criteria includes results in which Person Type = "Suspect." Records with Unknown Race/Ethnicity data are not included.

Stops and Searches

STOPS AND SEARCHES

In Q3 2022, 4225 stops showed a 63% decrease from Q3 -2021. Of those stops, 984 resulted in searches (24%). White subjects accounted for 34% of all stops and 29% of all searches. Black subjects accounted for 23% of stops and 36% of searches.

Compared to Q3 2021, the percentage of total stops decreased by 3% for White subjects and remained relatively the same for subjects of all other races and ethnicities.

Stops and Searches

Percentage of searches have declined slightly in Q3 2022 for White, Asian, and Hispanic/Latino, and increased by 4% for Black/African American individuals and 3% for Other individuals.

	STOPS			SEARCHES		
Perceived Race / Ethnicity	Q3-2021 (n=6,690)	Q3-2022 (n=4,225)	%Δ from Q1-2021	Q3-2021 (n=1,332)	Q3-2022 (n=1,020)	%Δ from Q1-2021
Asian	14%	13%	-0.7%	8%	6%	-2%
Black/ African American	22%	23%	0.3%	32%	36%	4%
Hispanic/ Latino	19%	19%	0.2%	24%	22%	-1%
White	37%	34%	-3.2%	33%	29%	-4%
Other	8%	11%	3.5%	4%	7%	3%

Note: "Perceived" identifiers are used to categorize demographic information specific to Stop Data Collection System

Stops and Searches

SEARCHES BY LEVEL OF DISCRETION

The Department classifies the various types of searches into three categories:

1. Discretionary² searches,
2. Administrative searches, and
3. Other searches.

Discretionary searches require an officer to ask and receive consent to search. In such cases, officers have the most flexibility in determining who to search and include only those occurrences where consent is the only basis provided. Administrative searches include those that occur because of a search warrant, arrest, or vehicle inventory. Other searches have a variable range of discretion and include reasons such as officer safety, suspected weapons, visible contraband, evidence of crime, etc.

Discretionary Searches	Administrative Searches	Other Searches
*Consent Given	*Incident to Arrest	*Officer Safety/ Safety of Others
	*Search Warrant	*Suspected Weapons
	*Vehicle Inventory	*Visible Contraband
		*Odor of Contraband
		*Canine Detection
		*Evidence of Crime
		*Emergency
		*Suspected Violation of School Policy
		*Condition of Parole/ Probation/ PRCS/ Mandatory Supervision

² In Q3, 2021, the SFPD has renamed search categories from 'Consent Only' and 'Supervision Searches' to 'Discretionary' and 'Administrative' searches to align with terminology being used by the California Department of Justice and the Race and Identity Profiling Act Board.

Stops and Searches

The 1020 total searches conducted in Q3-2022 were categorized below. Many of these incidents have more than one cause for search and are included in multiple categories.

- Discretionary Searches: 71 (7%)
- Administrative Searches: 710 (70%)
- Other Searches: 494 (48%)

Discretionary searches have decreased by 19% overall since Q3-2021

Stops and Searches

Other searches have decreased by 34% overall since Q3-2021.

Stops and Searches

SEARCH YIELD RATES

The average yield rate for all searches was 42% in Q3-2022. The yield rate was 25% for consent only searches, 52% for supervision searches, and 48% for other searches.

As noted in the Phase III SFPD Collaborative Reform Initiative report:

“The assumption among researchers is that if the rate of discovering contraband during searches of a particular identity group is low, then those people are “objectively less suspicious and may be searched, at least in part, because of their perceived identity.” <https://oag.ca.gov/sites/all/files/agweb/pdfs/ripa/ripa-board-report-2021.pdf> AT PAGE 48.

In turn, if the hit/yield rate for a particular identity group increases, that means that officers are using more objective factors – and not a person’s perceived identity – to make the decision to search a person. In short, higher hit/yield rates suggest that officers are less likely making a biased decision to search, but are rather using objective factors to inform their decision-making.³”

³ SFPD Collaborative Reform Initiative Phase III – Final Assessment Report, Hillard Heintze, 2022, p 6, footnote 11.

Use of Force

What Policy Changes Were Made?

Physical Control Threshold

Most significantly, the April 2022 policy reduces the reporting threshold for uses of force by removing the complaint of pain standard present in the 2016 policy. Previously, the 2016 policy noted (emphasis added):

*Any use of force which is required to overcome subject resistance to gain compliance that results in death, injury, **complaint of injury in the presence of an officer, or complaint of pain that persists beyond the use of a physical control hold.***

Specifically, the April 2022 policy notes (emphasis added):

*“Officers shall report any use of force involving physical controls that are used **in any attempt to overcome any resistance, regardless of injury or complaint of pain.** Use of control holds to effect handcuffing, where the person does not offer physical resistance, is not injured, and does not complain of pain, are not included.”*

Firearm Pointing

In 2016, the pointing of a firearm was added as a reportable use of force. The April 2022 policy added having a firearm pointed at low ready toward a person as a new category. The “ready” position generally refers to an officer’s unholstering of and preparing the grip on their firearm due to knowledge that circumstances may require a quick reaction but does not include aiming the firearm at a person or target. “Low ready” refers to the “ready” position that is pointed toward the ground.

Under the 2016 policy:

REPORTING. When an officer intentionally points any firearm at a person, it shall be considered a reportable use of force.

Under the April 2022 policy:

...the pointing of a firearm (including low ready) at or in the direction of a person is a reportable use of force.

Drawing and Exhibiting a Firearm

The April 2022 policy introduces the collection of a new category of incident data: drawing or exhibiting a firearm. To create distinction from firearm pointing, the policy specifically states that::

DRAWING AND EXHIBITING A FIREARM. The mere drawing and exhibiting of a firearm is not a reportable use of force. However, the pointing of a firearm (including low ready) at or in the direction of a person is a reportable use of force.

The drawing and exhibiting of a firearm by itself is not a use of force in the April 2022 policy; as such, that data is not included in this report at this time. The CPE City report connected SFPD's high rates of pointing of a firearm with lethal uses of force. SFPD, having implemented Crisis Intervention Training and adopted efforts to use time, distance, and de-escalation tactics, has seen the use of lethal force decline and the reductions in pointing of a firearm have driven the reductions in all uses of force. Similarly, SFPD can use the drawing and exhibiting data to inform future training efforts and policy changes to continue to reduce the likelihood of officers using lethal force.

Technical Notes

The transition to the April 2022 policy also allowed the SFPD to transition to an electronic entry system, as opposed to printed forms that were filled out and sent to a central point for data entry. Adoption of this system is part of continual improvement that builds on DOJ Recommendation 4.1, issued in 2016, which notes "...the department needs to create an electronic use of force reporting system so that data can be captured in real time."

The use of force data system is a sub-system in our Crime Data Warehouse, which serves as SFPD's records management and incident report system of record. Because uses of force are tied to specific incidents, future analyses will be possible, such as understanding whether the type of incident or location of incident or other factors contribute to the escalation of an incident. Of note: the Airport Bureau uses a different incident report system that is compatible with the San Mateo County systems of record and will continue to use a paper-based reporting method.

Dataset Caveats

As SFPD produced the QADR for Q3, 2022 with a new UoF dataset and structure, several areas of the data collection system that may represent errors generated by the system or unintentionally capturing data where there should be none were discovered. These were noted and provided to SFPD's technical team for remediation. To complete the analysis, the following assumptions were made, accompanied by their impacts to the data:

Field(s)	Application or Caveat
CAD Number, Incident Report Number, Time, Time Span, UoF Subject, Uof Type	Records entered with no incident report number, CAD number, time, timespan, UoF Subject, or UoF type are verified for accuracy of use of force data and counts. v. 42 lines of data were reviewed and included in the report. 28 lines of data (4 incidents) are excluded from this analysis due to missing subject info.
Officer Information	Records entered with a UoF subject, and use of force, and but with no officer information are included after careful review of the data. Generation of these data points may be a technical error within the data collection application. There were 6 lines where Officer info was missing. The information was reviewed and entered manually, and is included in this analysis.
Reason for Drawing/Exhibiting firearm description	Records with multiple "Officer Reason for Drawing Firearm Description" lead to duplicated uses of force in situations where both a drawn/exhibited entry AND a UoF entry are generated by a single officer on a single subject. Only one of each type of UoF per reason for drawing firearm, per officer, per subject is counted. .
Type of Force Used: Other	This category formerly had a field of descriptive text to clarify which force type was used. As of publication, the system does not provide a description for the "Other" UOF types. Upon manual review, this field is now being used to also indicate instances where there are multiples of the same type of force applied, by the same officer against same subject during a single incident. Such additional UOF was not collected in the past system. Additionally, manual review of incidents notes some entries may also include overreporting, to include counting of 'handcuffing', 'assisting upright to a seated position' and others.
Airport Data	Due to the Airport Bureau using the San Mateo County incident reporting system, the Airport Bureau Supervisory Use of Force Evaluation forms still utilize a manual entry system. As of publication, data from the Airport has not been integrated into the rest of the Department's use of force data. As such, Airport Bureau data is not available for publication in

	this report. Upon data integration, Airport data from Q2 2022 onward will be published.
Completed Supervisory Use of Force Forms	Only approved Supervisory Use of Force forms approved by commanding officers are available for use in the dataset. Forms that are pending approval signatures on the date of the use of force data pull are not included in this analysis but are captured in future analyses as they become available in the system.

Qualitative Notes

With the implementation of the 2022 policy, Department members have requested clarification of some aspects of the policy. These include the exact threshold for the use of a control hold, interpretation of the seating of an individual, and how to capture multiple similar uses of force in the same incident in the current use of force data application. Due to the broad changes in the use of force standard, data captured under the 2022 policy may be overreported as officers adjust to the new reporting standards.

Comparing Apples to Apples

To provide a comparable set of information between our two standards, this report attempts to track use of force data using both the 2016 and 2022 policies. This allows for the SFPD to provide current use-of-force information using the 2022 policy, while also allowing for review of comparable actions taken under either policy. To do this, the standards in the 2016 policy were applied as a filter against the data collected under the 2022 policy. Specifically, the following logic was applied:

Field	Application
Physical Control	When comparing the two standards, where complaint of pain was not indicated during a physical control hold, the record was not included in the 2022 data. The 2016 use of force policy only required reporting a physical control hold when the subject complained of pain.
Firearm Low Ready	Records with Firearm Low Ready as type of force were not included as this type of force is not in the 2016 policy.
Firearm Drawn & Exhibited	Records that have any value listed in the "Officer Reason for Drawing Firearm Description" field AND have no additional use of force recorded were not included. This is not

	considered a use of force and the data point is new to the 2022 policy.
See above	The dataset caveats noted above regarding duplicates, blanks and other categories apply as filters to this analysis as well.

Despite best efforts, data utilizing the above filters does not appear to fully capture a like-for-like comparison of 2022 policy data against 2016 data. This may be due to a level of increased reporting (or over-reporting) of uses of force by members even after accounting for the above filters.

Future Analysis

To better understand the numerical increases in reported uses of force, future analysis may include attempting to understand if the numerical increase in uses of force is solely caused by new and broader reporting requirements, or something else altogether.

Use of Force Data Methodology Update

Data Collection Changes Resulting from Policy Changes

On January 12, 2022, the San Francisco Police Commission adopted a revised policy providing guidelines for the use of force, called “[Use of Force & Proper Control of a Person](#).⁴” Ninety days later, on April 12, 2022, the SFPD transitioned to this revised use of force standard.

The 2022 policy revision changed multiple definitions to use of force reporting standards. These changes in the scope and/or definition of reporting thresholds, paired with new use of force categories and data collection requirements, are driving significant increases in reported uses of force by SFPD. The chart below shows this difference by comparing similar categories in Q3 2022 with Q3 2021.

⁴ <https://www.sanfranciscopolice.org/sites/default/files/2022-11/SFPDDGO-5-01-20221116.pdf>

USE OF FORCE

During Q3-2022, the Department responded to 140,923 total calls for service. Department officers were assaulted 33 times and force was used in 822 incidents which represented 0.58% of all calls for service. Of those 822 incidents, force was used 2,372 times by 763 officers against 934 subjects. **There was one Officer Involved Shooting - Use of Force incident during Q3-2022 resulting in no deaths.**

Changes to the Use of Force Department General Order and associated data collection is discussed in the data exploration section of this report and should be kept in mind when interpreting these data.

Where possible this report provides data under both the 2016 and 2022 Use of Force policy to allow for historical context and tracking of trends over time.

Use of Force

White individuals were the subjects of 32% of the total uses of force, 42% against Black/African American, and 20% against Hispanic/Latino. The proportion of uses of force against all demographic groups has remained relatively constant, with increasing variability in the last few quarters. For example, from Q3 2021 to Q3 of 2022, uses of force against Asian subjects increased by 1.9%, to account for 3.4% of all uses of force in Q3, 2022 with uses of force against Black/African American subjects increasing by 2.4% as compared to the same quarter last year, increasing to 42.4% of all uses of force in Q3-2022. Uses of force against Hispanic/Latino subjects decreased by 7.1% and increased by 4.9% against White subjects.

Race/Ethnicity	Uses of Force Q3-2021 (n=353)	Uses of Force Q3-2022 (n=387)	%Δ from 2021
Asian	1.4%	3.4%	1.9%
Black/African American	39.9%	42.4%	2.4%
Hispanic/Latino	27.5%	20.4%	-7.1%
White	26.9%	31.8%	4.9%
Other	4.2%	2.1%	-2.2%

Use of Force

TYPES OF FORCE USED

Under the 2016 Use of Force policy, Physical Control, Firearm Pointing and strike by object were the top three types of force used and accounted for 94% of total Uses of Force in Q3 2022.

	Previous Reporting Standard - Q3 2021	Previous Reporting Standard - Q3 2022	% Change
Chemical Agent	16	4	-75.0%
ERIW	10	12	20.0%
Firearm OIS	0	4	not calc
Firearm Pointing	162	32	-80.2%
Impact Weapon	5	1	-80.0%
Other	1	2	100.0%
Physical Control Hold/Take Down	125	318	154.4%
Spike Strips	7	0	-100.0%
Strike by Obj. (personal body weapon)/Fist	28	14	-50.0%
Grand Total	354	387	9.3%

	New Reporting Standard - Q3 2022
Chemical Agent	14
ERIW	5
ERIW 40mm	27
Firearm Low Ready	215
Firearm OIS	4
Firearm Pointing	293
Impact Weapon	4
Other	9
Physical Control Hold/Take Down	1727
Strike by Obj. (personal body weapon)/Fist	50
Vehicle Intervention	24
Grand Total	2372

Under the 2022 Use of Force policy, Physical Control, Firearm Low Ready, and Firearm Pointing were the top three types of force used and accounted for 85.8% of total Uses of Force in Q3 2022.

Arrests

ARRESTS

There were 3,808 arrests during the Q3-2022, a 18% increase from Q3-2021 (3,234). Black/African American subjects accounted for 33% of all arrests, while White subjects accounted for 31%.

Percentage of Total Arrests			
Race/ Ethnicity	Q3-2021 (n=3,234)	Q3-2022 (n=3,808)	%Δ from 2021
Asian	7%	5%	-1%
Black/ African American	32%	33%	1%
Hispanic/Latino	29%	28%	-1%
White	28%	31%	3%
Unknown	4%	3%	-1%

Overall arrests of White subjects increased by approximately 3% in Q3 2022 compared to Q3 2021.

*Detailed data regarding age groups and gender can be found later in this report.

Arrests

ARRESTS BY DISTRICT

It is important to note that arrests made by Department members at San Francisco International Airport are investigated by and reported as part of San Mateo County data and are not included in the City's totals.

The "Outside SF/Other" category includes arrests made by Department members outside the jurisdiction of the City and County of San Francisco by the SFPD and arrests inside the City and County of San Francisco by agencies other than the SFPD that are captured by our Incident Reporting system.

Overall arrests made by Department members within the City and County of San Francisco jurisdiction increased in Q3-2022 compared to Q3-2021 by 18%.

District	Q3 2021	Q3 2022	% change
Co. A - Central	427	461	8%
Co. B - Southern	461	525	14%
Co. C - Bayview	345	341	-1%
Co. D - Mission	476	458	-4%
Co. E - Northern	272	374	38%
Co. F - Park	130	77	-41%
Co. G - Richmond	144	139	-3%
Co. H - Ingleside	221	233	5%
Co. I - Taraval	189	146	-23%
Co. J - Tenderloin	512	991	94%
Outside SF	57	63	11%
Total	3,234	3,808	18%

Bias-Related Complaints

DEPARTMENT OF POLICE ACCOUNTABILITY

The Department is required to obtain information from the Department of Police Accountability (DPA) regarding the total number of complaints received during the reporting period that it characterizes as allegations of bias based on race or ethnicity, gender, or gender identity. The Department also is required to include in its report the total number of complaints DPA closed during the reporting period that were characterized as allegations of bias based on race or ethnicity, gender, or gender identity, as well as the total number of each type of disposition for such complaints.

Cases Received in Q3-2022

Type of Case Received	# of Cases
Racial Bias	1
Gender Bias	0
Transphobic Bias	1
Both Racial and Gender Bias	0
TOTAL	2

DPA received 187 total cases for the quarter.

0 Officers were named for allegations of racial or gender bias.

Total Cases received in 2022 involving Racial or Gender Bias: 6 Cases

During Q3-2022, DPA completed 6 complaint investigation cases in which there was an allegation of racial/ethnic bias. There were no sustained findings indicating bias. There were no sustained allegations of racial or gender bias in Q3-2022.

Q3-2022 Case Closures & Dispositions

Type of Case	Sustained	Mediated	Unfounded	No Finding	Insufficient Evidence	Proper Conduct	Referral	TOTAL
Racial Bias	0	0	1	0	1	0	1	3
Homophobic Bias	0	0	0	0	0	0	0	0
Gender Bias	0	0	0	1	0	0	0	1

DPA closed a total of 205 cases for the quarter, including above.

DPA closed a total of 569 cases for the year, including above

Bias-Related Complaints

BIAS-RELATED COMPLAINTS RECEIVED BY SFPD, AND INVESTIGATED BY THE DEPARTMENT OF HUMAN RESOURCES

As part of the Department's commitment to transparency, the Department also reports on all bias-related complaints received internally from members of the Department and forwarded to the Department of Human Resources (DHR) for investigation. Closed cases may include complaints received in previous quarters. Bias-related complaints are referred to as Employment Equal Opportunity (EEO) cases by DHR.

Q3-2022 Bias Cases Received

Source: SFPD Risk Management EEO Quarterly Report

Population Benchmark Analysis, Per Capita Race/Ethnicity

The San Francisco Police Department received requests from various key community stakeholders to present a per capita population benchmark analysis. This analysis captures a particular race or ethnicity, as compared to their representation in a similar population of 1000 individuals. We adjust for population in our analysis by the race/ethnic demographic groups in our data. This analysis is compared within this report's quarter and all quarters with data available. A disparity analysis- the contrast between different race/ethnicity groups against each other- is also considered to generate a numerical comparison. This analysis may surface potential racial disparities when comparing policing activities with the various demographic groups. In all cases, a population benchmark analysis that presents per capita results will have challenges, as noted below.

What is a benchmark?

A benchmark is a common frame of reference, created by comparing at least two sets of data to each other, to consider trends and context presented in the data. In this analysis, we compare citywide population demographics against pre and post stop activities by SFPD, and then convert those contact ratios into a Per Capita (or by 1000) number.

Population Benchmark Weaknesses

As noted by the California Department of Justice in their RIPA 2021 report, "An assumption of this type of comparison is that the distribution of who is stopped would be similar to who resides within a comparable geographic region. However, this is not always the case, as people may travel a considerable distance from where they live for several reasons (e.g., to go to work, visit family).⁵" The supposition that the comparison of police data should reflect the residential population makeup makes several assumptions that are not addressed in this analysis, and may result in inaccurate results of the comparative disparities noted in the analysis.

Comparing against residential population does not account for individuals who travel outside their home residential district or zip code in the residential population count, potentially causing over or under representation in the data⁶.

⁵ [2021 RIPA Board Report - Racial and Identity Profiling Advisory \(RIPA\) Board \(ca.gov\)](#) Pp46

⁶ <https://oag.ca.gov/sites/all/files/agweb/pdfs/ripa/ripa-board-report-2020.pdf> pp26-27

Q3 Quantitative Analysis

Per Capita Population Benchmark

It should be noted that SFPD categorizes residential population demographics differently than other agencies. For instance, the Census American Community Survey (ACS) and Racial and Identity Profiling Act (RIPA) have different data standards. When the RIPA board data is used, it is perceived demographic data being compared to self-reported demographics in the residential population data.

Further, “Population counts generally overestimate bias in stop decisions, as differences in poverty, education, and labor market opportunities vary across identity groups in the U.S. Because education and employment affect criminal behavior, disparities along these dimensions will lead to disparities in who commits crime. In this way, pre-existing social disparities will tend to make the fraction of Black or Latinx people in the population smaller than the fraction of Black or Latinx people who are potentially subject to being stopped, overestimating any bias in a stop decision.”⁷

Despite these known limitations in working with population data within a benchmark, it does not mean analysis using a population benchmark is invalid. These limitations should, however, be kept in mind when interpreting results of any population benchmark. Results of population benchmarks can inform future analysis’ and provide insight into potential disparities, trends, and differences between geographic areas, such as SFPD districts.

Population Benchmark Strengths

A key benefit in using a population data benchmark is the intuitive ease of understanding as compared to other benchmarks. Other benchmarking techniques can utilize univariate or multivariate statistical analysis that can be hard to explain succinctly and can quickly become overwhelming.

What did SFPD do?

SFPD took a citywide demographic dataset from the 2019 American Community Survey (ACS), administered by the US Census Bureau. Race/Ethnicity groupings are then consolidated to match current Department systems, with Asian and Native Hawaiian/Pacific Islander groups combined into the Asian group, and two or more races, some other race alone and American Indian/Alaska Native combined into the Other grouping. The percentage demographic representation in various data and generated a per capita (per 1000 residents) count along with a table and graph for each activity. Data

⁷ <https://www.capolicylab.org/wp-content/uploads/2020/10/RIPA-in-the-LAPD-Summary-Report.pdf> pp12-13

Q3 Quantitative Analysis

Per Capita Population Benchmark

used for comparison to the population benchmark and per capita calculation was gathered during the fourth quarter of 2021 (January 1, 2022 – March 31, 2022). All available data was used for the historical per capita analysis, reaching back to either 2016 or the second half of 2018, depending on the dataset. All available prior year data was compared with overall trends per capita against types of SFPD activity, by demographic group. Finally, we conducted a disparity analysis by comparing per capita demographic data for certain groups against each other to determine if disparate treatment may be occurring.

Specific Methodology Notes

In addition to the general challenges of a population benchmark, noted above, the SFPD would like to highlight the additional methodological notes for clarity and context.

- Census⁸/ACS data considers “Hispanic” as an ethnicity, while the suspect, stops, searches, uses of force, and arrest data considers “Hispanic” as a race.
- Suspects per District: Crime Data Warehouse was searched for persons categorized as “Suspects” on police incident reports. Suspect demographic information may be developed from calls for service or it may be developed at a subsequent point during investigation of an incident. All police incident reports (initial or supplemental) having a data value are included. Suspects with unknown race values are not included. While some suspects are subsequently arrested, and also listed as “booked” or “cited” on police incident reports, this category is not intended to include arrestees.
- Stops information provided reflects entries into the Stop Data Collection System (SDCS), a data collection tool provided by the California Department of Justice to assist departments in complying with AB953 and the RIPA Board’s data collection requirements.
- Searches information provided reflects entries into the SDCS, with the same caveats as above.
- Uses of Force information provided reflects entries into the Department UoF Database and account for a distinct count of uses of force broken down by District and race of subject force was used against.

⁸ SFPD discovered a calculation error in Q4, 2021 when tabulating census data. The error and corrected tables are included in the Q4, 2021 QADR.

- 
- Arrests count persons “booked” and “cited” where an incident report (initial or supplemental) had a date value.

Q3 Quantitative Analysis

Per Capita Population Benchmark

Quarter Per Capita Interactions

Using the previously mentioned methodologies, the following trends are noted.

Citywide suspect data shows in Q3 of 2022, 71 of every 1000 Black/African American residents of San Francisco may be reported as a suspect to a crime, as compared to 4 of every 1000 White residents.

Citywide stops data shows in Q3 of 2022, 21 of every 1000 Black/African American residents of San Francisco may be stopped, as compared to 4 of every 1000 White residents.

Q3 Quantitative Analysis

Per Capita Population Benchmark

Citywide search data shows in Q3 of 2022, roughly 8 of every 1000 Black/African American residents of San Francisco may be searched as part of another interaction with the SFPD, as compared to less than 1 of every 1000 White residents.

Using the 2022 UoF policy, citywide Use of Force data shows in Q3 of 2022, 19 of every 1000 Black/African American residents of San Francisco may be subject to a use of force, as compared to 1.9 of every 1000 White residents

Q3 Quantitative Analysis

Per Capita Population Benchmark

Citywide arrest data shows in Q3 of 2022, roughly 28 of every 1000 Black/African American residents of San Francisco may be stopped, as compared to 3 of every 1000 White residents.

Q3 Quantitative Analysis

Per Capita Population Benchmark

Per Capita Interactions by Race

Analysis was conducted using the above methodology across all quarters from which we have useful data. In this case, starting in Q1, 2016 for Arrests, Uses of Force and Suspect data, and 2018 for Stops and Searches. We found the following trends. Note: Data labels and trend lines for the most impacted group(s) are included for context and clarity.

Citywide suspect data since 2016 shows that Black/African American individuals have been reported as suspects of crimes significantly higher than other demographic categories. On average, however, there has been a slight decline over time, of the per capita inclusion of Black/African American residents within suspect reporting.

A linear trendline is produced for the most impacted group. Slopes for all trendlines are included in the above table to allow for comparison. Slope represents the average change, per demographic group, per quarter. In this case the number of Black/African American individuals included in suspect data goes down 1.299, per 1000 Black/African Americans, per quarter, on average, over time.

Rate of Decrease, Suspects Per Capita	
Race	Slope
Black	-1.299
Asian	-0.022
Hispanic	-0.047
White	-0.024
Other	-0.962

Q3 Quantitative Analysis

Per Capita Population Benchmark

Citywide stops data since 2018 shows that Black/African American individuals have been stopped by the SFPD at significantly higher rates per capita than other demographic categories. There has been a significant decline over time, on average, of the per capita number of Black/African American stopped in a vehicle or pedestrian stop since mid-2018.

A linear trendline is produced for the most impacted group. Slopes for all trendlines shown in the above table to allow for comparison. Slope represents the average change, per demographic group, per quarter. In this case the number of Black/African American individuals included in tops data goes down 10.54, per 1000 Black/African Americans, per quarter, on average, over time.

Rate of Decrease, Stops Per Capita	
Race	Slope
Black	-10.547
Asian	-0.755
Hispanic	-2.578
White	-1.834
Other	-4.068

Q3 Quantitative Analysis

Per Capita Population Benchmark

Citywide search data since 2018 shows that Black/African American individuals have been searched in connection with an interaction with the SFPD at rates higher than other demographic categories. There has been a significant decline over time, on average, of the per capita number of Black/African Americans searched since mid-2018.

A linear trendline is produced for the most impacted group. Slopes for all trendlines shown in the above table to allow for comparison. Slope represents the average change, per demographic group, per quarter. In this case the number of Black/African American individuals included in search data goes down 2.875, per 1000 Black/African Americans, per quarter, on average, over time.

Rate of Decrease , Searches Per Capita	
Race	Slope
Black	-2.875
Asian	-0.064
Hispanic	-0.491
White	-0.237
Other	-0.243

Q3 Quantitative Analysis

Per Capita Population Benchmark

Citywide use of force data since 2016 shows that Black/African American individuals have been subject to a use of force at significantly higher rates as compared to other demographic categories. There has been a decline over time, on average, of the per capita number of Black/African Americans upon whom use of force has been used since 2016.

A linear trendline is produced for the most impacted group.

Slopes for all trendlines shown in the above table to allow for comparison. Slope represents the average change, per demographic group, per quarter. In this case the number of Black/African American individuals included in UoF is at -.272, per 1000 Black/African Americans, per quarter, on average, over time.

Rate of Decrease, UoF Per Capita	
Race	Slope
Black	-0.272
Asian	-0.006
Hispanic	-0.042
White	-0.014
Other	-0.008

Due to the change in Use of Force policy, the 2016 policy data is used to provide context over time. A separate calculation for per capita use of force is included using only the 2022 UoF policy below.

The data exploration section of this report delves into detail regarding the policy changes, and analytical methods used to derive the 2016 policy data

Data collected under the 2022 Use of Force policy shows that Black/African American individuals have been subject to a use of force at significantly higher rates as compared to other demographic categories. Comparisons over time, and rate of change are not available as this is the first quarter of reporting under the 2022 policy.

Q3 Quantitative Analysis

Per Capita Population Benchmark

Citywide arrest data since 2016 shows that Black/African American individuals have arrested at significantly higher rates as compared to other demographic categories. There has been a modest decline over time, on average, of the per capita number of Black/African Americans arrested since 2016.

A linear trendline is produced for the most impacted group. Slopes for all trendlines shown in the above table to allow for comparison Slope represents the average change, per demographic group, per quarter. In this case the number of Black/African American individuals included in Arrest data goes down 1.33, per 1000 Black/African Americans, per quarter, on average, over time.

Rate of Decrease , Arrests Per Capita	
Race	Slope
Black	-1.338
Asian	-0.026
Hispanic	-0.118
White	-0.127
Other	-0.059

Q3 Quantitative Analysis

Per Capita Population Benchmark

Yearly Per Capita Disparity Analysis

We further conduct a disparity analysis by baselining the 3 most represented demographics against each other to find a numerical representation of the disparity between groups, per SFPD interaction, per year. As with the other per capita analysis, Black/African American residents of San Francisco have higher rates of disparity in the data as compared to the White and Hispanic demographics groups.

Citywide suspect data shows that since 2016, Black/African American residents are between 14 to 19 times more likely to be listed as a suspect, than White residents.

Q3 Quantitative Analysis

Per Capita Population Benchmark

Citywide vehicle and pedestrian stop data shows that since mid-2018, Black/African American residents are 5 to 7 times more likely to be stopped than White residents.

Citywide search data shows that since mid-2018, Black/African American residents are between about 8 to 12 times more likely to be searched than White residents.

Q3 Quantitative Analysis

Per Capita Population Benchmark

Due to the change in Use of Force policy, the 2016 policy data is used to provide context over time. A separate calculation for per capita use of force is included using only the 2022 UoF policy.

Under the 2022 Use of Force Policy, in Q3 2022, Black/African American residents are 9-10 times more likely to be stopped than white residents.

Q3 Quantitative Analysis

Per Capita Population Benchmark

Citywide arrest data shows that since 2016, Black/African American residents are between 10 to 11 times more likely to be arrested than White residents.

What did we find?

We found that Black/African American individuals are significantly more often involved in various SFPD interactions than their representation in the population, especially when compared to White residents. These findings provide context around who is involved with the SFPD at various points of engagement but does not answer the question of 'why' this is the case.

It is possible that some or all factors discussed in the benchmark description section above are affecting the data in some way.

The context provided gives us a common frame for conversation, mutual understanding, and a starting point from which additional analysis may occur.

What's next?

The Department looks forward to continuing analysis of data on a quarterly basis. However, it should be noted that SFPD will need to build out analytical capacity in order

to carry out some of this work, and timeline expectations will be shared and updated with the publishing of each quarterly report.

The SFPD has also partnered with multiple academic entities to assist in academic level analyses of SFPD data, including:

- The California Policy Lab at UC Berkeley and UC Los Angeles,
- Stanford's SPARQ center,
- Palo Alto University, and
- The Center for Policing Equity
- New York University

The above information, along with this report in its entirety, represent the efforts of the San Francisco Police Department to comply, in part, with the recommendations of the USDOJ's assessment report of the Collaborative Reform Initiative. The central purpose of implementing the recommendations from the report is to make the changes demanded by the communities of San Francisco and, as a result, re-build trust. In addition to the recommendations outlined in the USDOJ report, SFPD developed a strategic framework, referred to as Safety with Respect, which articulates the guiding principles for how SFPD as an organization, and its members, will conduct its/their work and make improvements to the Department as a whole. Safety with Respect includes the efforts at increasing transparency surrounding SFPD's daily interactions and activities in San Francisco communities. The below update on Collaborative Reform implementation seeks to demonstrate SFPD's commitment to the community's demands for change.

Collaborative Reform Update

Collaborative Reform Initiative Status

The SFPD received its Phase III Collaborative Reform Initiative (CRI) report, compiled by an external contractor, and validated by the California Department of Justice, was issued in February 2022. [The report](#) notes that SFPD has reached substantial compliance on 245 of 272 recommendations originally issued by the Federal Department of Justice. The 27 remaining recommendations will be compliant upon the completion of four significant, longer-term projects or the submission of supporting documentation with a longer lead-time.

As of April 6, the 5 focus areas of CRI held the following status:

Focus Area	Status	Total
1 - Use of Force	In Progress	7
	Substantial Compliance	51
2 - Bias	In Progress	7
	Substantial Compliance	47
3 - Community Policing	In Progress	6
	Substantial Compliance	54
4 - Accountability	In Progress	7
	Substantial Compliance	61
5 - Recruitment, Hiring, and Personnel Practices	In Progress	0
	Substantial Compliance	32
Sub Total	In Progress	27

Sub Total	Substantial Compliance	245
Grand Total		272

SFPD’s website provides documentation for all substantially compliant recommendations, which includes SFPD’s submission summary and both the evaluator’s and California Department of Justice’s summaries detailing compliance. The website also includes an interactive dashboard providing specifics for all recommendations, including the wording and statuses of each.⁹

Remaining CRI Recommendations

The remaining 27 recommendations group into 6 major projects, under 4 remaining focus areas, as noted below.

In Progress Recommendations Project Plans

Use of Force	Community Policing	Bias	Accountability
Arrests Systems, Data & Analysis	Annual Plans/Cmtty Forums	Data-informed Professional Development	Data-informed Management Tools
20.1	26.1	28.1	68.1
20.2	40.2	28.4	
20.3	40.6	28.5	
20.4	48.1	30.3	
UoF Systems, Data & Analysis	48.2	30.4	Discipline Review Board; Metrics
21.1		35.3	69.2
22.1		79.1	69.3
		79.2	
		79.3	

Understanding the need for a continued fair and impartial evaluation of the Department’s progress, the City has renewed, through April 2024, a Memorandum of Understanding with the California Department of Justice. Additionally, SFPD intends to

⁹ <https://www.sanfranciscopolice.org/your-sfpd/police-reform>

extend the independent consultants' external review contract to continue to bring their professional expertise and knowledge of best practices in other agencies.¹⁰

These remaining projects are expected to be the lengthiest to complete of the 272 original recommendations, due primarily to requirements around technology procurement, design, and implementation, as well as the need to plan for and hire permanent staff with analytical capacity and to support the ongoing improvements necessary to sustain reform. As noted in the Phase III report, SFPD has begun work on these projects and will continue to report progress to the Police Commission and on the SFPD website.

CRI Sustainability - To make collaborative reform a long term, permanent driver of change in the SFPD, it is necessary not only to complete a recommendation once, but also to re-engage that recommendation routinely to ensure its continued compliance.

Sustainability Requirements

Types of Review:

- Annual
- Quarterly
- Rolling (Bi-Annual)
- Single Document or Practice

Total Recommendations Requiring Sustainability Efforts:

187

	Use of Force	Bias	Community Policing	Accountability	Recruitment and Retention
Annual	9	12	29	15	8
Quarterly	16	20	16	20	16
Rolling (Bi-Annual)	11	1	15	13	7
Single Document or Practice	5	5	7	0	0
Total Recs for Topic*	37	34	47	42	27

*Some recommendations require multiple types of updates in a single recommendation.

This process is referred to as 'CRI Sustainability.'

¹⁰

https://sfgov.org/policecommission/sites/default/files/Documents/PoliceCommission/PoliceCommission120121-DOJ_SFPD_MOU_DRAFT_ADDENDUM%20%286%29.pdf

SFPD has reviewed all 245 completed recommendations and identified 187 that require a sustainability effort. These efforts are usually dictated by the compliance measures assigned to each recommendation and can include things like a policy review/update, a data or document audit, or a staff training. The expectation is that the reviews, reports, and analyses will provide opportunities to evaluate and improve upon the processes established and documented for CRI. Further, these sustainability efforts may be an annual, bi-annual, quarterly, or one-time requirement.

An example of sustainability that represents continuous improvement mechanisms is the most recent update of the Department General Order related to Use of Force. In 2016, after the commencement of the implementation phase of the Collaborative Reform partnership, the President of the San Francisco Police Commission and representatives from the Police Department and the Department of Police Accountability worked together to update this policy. In 2020, after an audit performed by the San Francisco Controller's Office, a report from the Center for Policing Equity, and ongoing reviews of community complaints and national concern regarding law enforcement's use of pressure to the head and neck, SFPD proposed an update to this policy. A new policy was adopted by the Commission in January and, after an implementation period, went into effect on April 12, 2022.

An example of a repeated process and reporting effort, CRI recommendation 40.1 required the generation of a Community Policing Strategic Plan. The Community Policing Strategic Plan was developed by an SFPD-led working group of community members and representatives and SFPD personnel. It was developed during 2017 and 2018, with publication in late 2018. The Community Policing Strategic Plan further required unit and station plans be developed and published annually, the first of which were completed this year [and can be viewed online](#).

As previously noted, SFPD has identified 187 recommendations with regularly required reporting or reviews. The remaining 58 recommendations were implemented as a one-time activity to reach substantial compliance. SFPD has begun the first year of validation that the ongoing work is being completed. SFPD also will review to ensure that circumstances that established the one-time recommendations as substantially compliant are still in place. These reviews are critical to the success of sustained and ongoing change in SFPD.

Domestic Violence Reporting

- Admin Code Sec. 96D.2b

Domestic Violence Reporting - Background

In November 2021, the Board of Supervisors approved, and Mayor Breed signed, legislation amending the San Francisco Administrative Code to require certain data involving Domestic Violence be reported on a quarterly basis [starting](#) in the first quarter of 2022. The report is to be submitted on a quarterly basis to the Board of Supervisors, the Mayor, Office of Racial Equity, the Human Rights Commission, the Department on the Status of Women, and the Police Commission.

Domestic Violence Calls for Service and Investigations

Domestic Violence, also known as Intimate Partner Violence, is abbreviated as DV for brevity in this report. For the purposes of this report, Admin Code 96D defines Domestic Violence as: *"Domestic Violence" means the crime defined in Section 273.5 and the crimes punishable under Section 243 (e){1}, of the California Penal Code.*

The SFPD responds to calls for service (CFS) received by the Department of Emergency Management (DEM) whether as a 911 emergency or through the non-emergency line. After gathering information from the caller, DEM staff has the responsibility of determining the appropriate code for the call, based on the information provided, and to dispatch units to the location as either a Priority A (highest), Priority B, or Priority C.

Upon arrival, SFPD officers conduct a thorough investigation into the allegations of domestic violence. Per SFPD policy, calls for service are coded with a final disposition of domestic violence (DV) in cases in which DV is evident during an officer's investigation.

In some cases, a report may be taken without a call to 911 (self-reporting at a police station, for example.) In these cases, a call for service number is generated during the report writing process.

This report includes data from 1 July 2022 through 30 September 2022.

Admin Code Sec. 96D.2b Reporting Components

1(A) The number of calls for service for Domestic Violence that the Police Department received from the Department of Emergency Management for the period of July 1 to September 30, 2022.

CALLS FOR SERVICE, FINAL CALL CODE INCLUDES "DV"				
July 1 to September 30, 2022				
	Jul	Aug	Sep	Total
DV Calls for Service	546	498	491	1,535

1(B) The number of Domestic Violence cases that the Police Department presented to the District Attorney for investigation and/or prosecution in the prior quarter, and of those cases, the number in which a child or children were present and/or a firearm or firearms were present.

DV INCIDENTS SUBMITTED TO THE DISTRICT ATTORNEY'S OFFICE			
	2022		
	Jul	Aug	Sep
Number of DV Cases Presented to the District Attorney's Office	105	91	91
Number of DV cases referred to the DA in which a child was present	13	10	10
Number of DV cases referred to the DA in which a firearm was present	2	1	2

Confiscation of Weapons: Pursuant to Penal Code § 18250 and Department policy, officers are mandated to confiscate any firearms or other deadly weapons discovered at the scene of a domestic violence incident. The weapon is booked into the Department's Property Room as evidence. As federal and state laws prohibit individuals convicted of a domestic violence charge from owning or acquiring a weapon, the Property Room follows DOJ protocols, including a criminal records' checks, to determine if the individual is eligible for release of the weapon.

Presence of Children: SFPD Department General Order 6.09 also outlines the procedures to follow if children are present during a domestic violence incident. DGO 7.04, Children of Arrested Parents, provides guidance to minimize the negative impact and harmful stressors on children when a parent/guardian is arrested whether in their presence or not. This policy is considered a national model, highlighting law enforcement's responsibility to ensure a safe environment for children following a traumatic experience such as the arrest of one's parent.

SFPD Quarterly Activity & Data Report

Stop Data Quarter 3 2022

In Q3-2022, there were a total of 4,225 stops, a 33% decrease from Q3-2021. Of those stops, 1,020 (24%) resulted in searches.

Total Stops Jul 1 - Sep 30, 2022				
Type of Stops	Jul	Aug	Sep	Total
Dispatched	452	411	452	1,315
Self-Initiated	890	912	1,108	2,910
Total Stops	1,342	1,323	1,560	4,225

Total Searches Jul 1 - Sep 30, 2022				
Type of Stops	Jul	Aug	Sep	Total
Dispatched	227	207	187	621
Self-Initiated	124	130	145	399
Total Searches	351	337	332	1,020

The Department utilizes the SDCS program definitions under AB953; a 'stop' is defined as 1) any detention, as defined in regulations, by a peace officer of a person or 2) any peace officer interaction with a person in which the officer conducts a search as defined in regulation.¹¹ Stops include Traffic Stops and Pedestrian Detentions. Stops may be Self-Initiated or Dispatched.

**Five stops during Q3 resulted in contact with the Department of Homeland Security or its subordinate organizations. One of the stop data entries that resulted in contact with DHS was part of the Recruit Academy training course and the entry was made as a learning process. CA DOJ was notified of the error and the entry is in the process of being removed from SFPD records.*

The other four incidents have occurred at the San Francisco International Airport where Department of Homeland Security/TSA was notified and responded as follows:

- A USA citizen was detained for not declaring a firearm that was in the luggage. The subject was stopped and detained. The DHS/TSA was notified of the incident and responded as is the policy in the event of possible imposition of civil fines.*
- A USA citizen was detained for going through a secured door after getting lost coming off a flight. The DHS/TSA was notified as is the policy.*
- A USA citizen went through a checkpoint with a stun-gun in their carry-on luggage. The subject was stopped and detained. The DHS/TSA was notified as is the policy.*
- A USA citizen went through a checkpoint with a stun-gun in their carry-on luggage. The subject was stopped and detained. The DHS/TSA was notified as is the policy.*

There was no violation of DGO 5.15, Enforcement of Immigration Laws.

Calls for Service, Q3 2022

Calls for Service

The Department responded to 140,923 total calls for service during Q3-2022. Call volume slightly increased month to month during the Q3-2022, and the month of September accounted for 49,114 calls for service, somewhat higher volume of calls compared to the months of July and August.

Data Source: San Francisco Police Department CAD

Suspects, Q3 2022

SUSPECTS OBSERVED AND/OR REPORTED TO SAN FRANCISCO POLICE DEPARTMENT

Suspect information/description is either provided by a member of the public, reported directly to the police or through dispatch, or is observed by a Department member during a self-initiated call for service in which there is reasonable suspicion or probable cause for an officer to conduct a stop. The suspect information is documented in a police incident report that is generated from the call for service.

The following table summarizing suspect descriptions gathered from incident reports through the means stated above. Data captured shows that approximately 39% of the subjects reported are Black/African American.

SUSPECTS by Race/Ethnicity July 1, 2022 - September 30, 2022					
DESCRIPTION	Jul	Aug	Sep	Q3 2022	% of Total Suspects Q3 2022
Asian/ Pacific Islander	122	119	125	366	4.5%
Black/ African American	971	1015	1151	3137	38.6%
Hispanic/ Latino	487	425	472	1384	17.0%
Native American	2	5	3	10	0.1%
White	538	522	599	1659	20.4%
Others	510	482	576	1568	19.3%
Total	2,630	2,568	2,926	8,124	100.00%

Note: Suspect data is extracted from incident reports via the Person Schema of Crime Data Warehouse via Business Intelligence tools. Search criteria includes results in which Person Type = "Suspect." Records with Unknown Race/Ethnicity data are not included.

Use of Force, Q3 2022

Total Use of Force Overview

January 1, 2016, through September 30, 2022

There were 952 Uses of Force in Q1-2016 compared to 2,372 in Q3-2022 under the new 2022 policy and 387 under the 2016 of Use of Force policy.

Changes to the Use of Force Department General Order and associated data collection is discussed in the data exploration section of this report and should be kept in mind when interpreting these data.

Where possible this report provides data under both the 2016 and 2022 Use of Force policy to allow for historical context and tracking of trends over time.

Use of Force, Q3 2022

Total Use of Force Overview by Subject Race/Ethnicity

During Q3-2022, 32% of the total Uses of Force were against White subjects, 42% were against Black/African American subjects and 20% were against Hispanic/Latino subjects.

Use of Force, Q3 2022

Uses of Force by Reason July-September 2022

In Q3-2022 To Effect a Lawful Arrest was the most common reason for use of force across both use of force policies.

Reasons for Use of Force - Q3 2022	Multiple reasons, PREVIOUS UOF criteria	Multiple reasons, NEW UOF criteria
Reason is to effect a lawful arrest, detention, or search	1116	5846
Reason is to overcome resistance or to prevent escape	1124	5444
Reason is to prevent a person from injuring himself/herself, when the person also poses an imminent danger of death or serious bodily injury to another person or officer	186	1005
Reason is to prevent the commission of a public offense	294	2005
Reason of others or in self-defense	477	2758
Reason to gain compliance with a lawful order	1044	5161
Grand Total	4241	22219

Reasons for Use of Force - Q3 2021	One Reason per UOF
To effect a lawful arrest, detention, or search, or to prevent escape	339
To gain compliance with a lawful order	2
To overcome resistance or to prevent escape	10
To prevent the commission of a public offense	3
Grand Total	354

As noted in the data exploration section, reason for use of force has gone from a single selection to a multiple select field. This can lead to more reasons for uses of force in data collected in Q3 2022 onward than actual uses of force, as seen above. Reasons for uses of force in Q3 2021 is presented as a comparison.

Use of Force, Q3 2022

Uses of Force by Race/Ethnicity, Gender, and Age of Officer Q3-2021 vs. 2022

During Q3-2022, using the 2022 UoF policy, White male officers accounted for 1033 (44%) of Uses of Force used, and Asian male officers accounted for 461 (19%) of Uses of Force used.

Department of Police Accountability (DPA)

The Department is required to obtain information from the Department of Police Accountability (DPA), formerly the Office of Citizens Complaints, relating to the total number of complaints for the reporting period received by DPA that it characterizes as allegations of bias based on race or ethnicity, gender, or gender identity. The Department also is required to include in its report the total number of complaints DPA closed during the reporting period that were characterized as allegations of bias based on race or ethnicity, gender, or gender identity, as well as the total number of each type of disposition for such complaints.

Allegations of Bias based on Race or Ethnicity, Gender, or Gender Identity

Cases Received in Q3-2022

Type of Case Received	# of Cases
Racial Bias	1
Gender Bias	0
Transphobic Bias	1
Both Racial and Gender Bias	0
TOTAL	2

DPA received 187 total cases for the quarter.

0 officers were named for allegations of racial or gender bias.

Total Cases Received in 2022 involving Racial or Gender Bias: 6 Cases

During Q3-2022, DPA completed 6 complaint investigations in cases in which there was an allegation of racial/ethnic or gender/gender identity bias. There were no sustained findings indicating bias.

There were no sustained allegations of racial or gender bias in 2022.

DHR Investigated Complaints of Bias

BIAS-RELATED COMPLAINTS RECEIVED BY SFPD, AND INVESTIGATED BY THE DEPARTMENT OF HUMAN RESOURCES

As part of the Department's commitment to transparency, the Department also reports on all bias-related complaints received internally by the Department and forwarded to the Department of Human Resources (DHR) for investigation. Closed cases may include complaints received in previous quarters. Bias-related complaints are referred to as Employment Equal Opportunity (EEO) cases by DHR.

Glossary

AB 953	Assembly Bill 953, also known as the Racial and Identity Profiling Act (RIPA) of 2015; requires CA law enforcement agencies to collect and report demographic data to the California Department of Justice
Administrative Code Chapter 96a	A San Francisco ordinance passed in 2016 that placed specified reporting requirements on the San Francisco Police Department
Bias by proxy	When a civilian racially profiles an individual and calls the police as a result
Cal DOJ	California Department of Justice
CBP	U.S. Customs and Border Protection
CDW	Crime Data Warehouse
City	City and County of San Francisco
CMCR	Critical Mindset Coordinated Response
Department	San Francisco Police Department
DGO	Department General Order
DGO 5.01	SFPD's Department General Order that provides guidelines for the application and reporting of Use of Force
DHR	San Francisco Department of Human Resources
DHS	U.S. Department of Homeland Security
DOJ	U.S. Department of Justice
DPA	Department of Police Accountability
EEO	Equal Employment Opportunity

EIS	Early Intervention System – a system that works to identify officers who could benefit from non-disciplinary intervention and designed to improve the performance of officers through coaching, training, and professional development
ERIW	Extended Range Impact Weapons
ICE	U.S. Immigration and Customs Enforcement
K-9	Police Dog (Canine)
OC	Oleoresin Capsicum spray or pepper spray
OIS	Officer Involved Shooting
PRCS	Post Release Community Supervision; used to classify probation and parole searches
RIPA Board	California’s Racial and Identity Profiling Advisory Board; produces an annual report on the past and current status of racial identity profiling and provides recommendations to law enforcement agencies
SDCS	Stop Data Collection System, the tool used to collect stops and search data in compliance with AB953.
SFPD	San Francisco Police Department
Spike Strips	Device used to impede or stop the movement of wheeled vehicles by puncturing their tires
TSA	Transportation Security Administration

Stop Data Collection System (SDCS) Data, Q2, 2018 – Q2 2022	To be published – DataSF.Org	Expected Publishing date Dec22/Jan23
Statewide Integrated Traffic Records System (SWITRS)	https://iswitrs.chp.ca.gov/Reports/jsp/index.jsp	Data query requested SF County, Q2 2018 – Q2 2022.

Methodology

An analysis of DGO 9.01 Draft dated 5.6.22 was conducted to generate the 9.01 Selected Stop List. Stop types in the DGO 9.01 draft were matched against associated California Vehicle Codes or SF Transportation Codes and then matched against the California Department of Justice (CalDOJ) Criminal Justice Information System (CJIS) table. As the Stops Data Collection System (SDCS) codes traffic stop data utilizing CJIS codes, this enables analysis of stop types in the Draft DGO against the CJIS codes in the dataset.

Draft DGO 9.01 lists 18 types of stops to be banned. 15 of the stops listed to be banned equate to 21 California Vehicle Codes. This is due to some stop types capturing more than one CVC code. I.e: Banning registration enforcement of CVC 4000 is assumed to include 4000.1, 4000.6, 4000(A), etc.

2 types of stops equate to 2 bike/scooter local transportation codes and 1 type of stop (no parking infractions unless the car is unoccupied) equate to 3 CVC codes related to parking and at least 58 local transportation codes related to parking.

Stops that do not have a CJIS code (local traffic code violations) are not included, as they are not currently coded to be disaggregated in the data. 3 types of stops of the 18 were excluded. Excluded stops may be an area for potential future analysis.

Of the 18 types of stops, 8 types of stops are modifications to current state or local law, ie: don't enforce X unless Y condition is met. (No littering stops unless the littering may cause injury or death.)

In cases where there is a modification recommended, it is included in the analysis without the modification as no data on the proposed modification is available. This may cause an overcount of stops (counting both the modified and unmodified versions of the proposed type of stop, as opposed to only the modified.)

The tables below layout the stop types, CVC code and CJIS codes utilized for the data exploration. Items in white are included in the analysis, items in blue are included without the associated modification, and items in red are not included.

DGO 9.01 draft 5.6.22	CJIS Code	Statute	Description
Driving without functioning or illuminated headlights, unless no headlights are functioning or illuminated and the sun has set. (Cal. Veh. Code § 24400(a)-(b)).	54014	24400	HEADLAMP:OPR/AMT/SIZE:VIO
Tinted windows (Cal. Veh. Code § 26708.5).	54015	26708.5	WINDOW INSTAL/ETC MAT VIO
Failure to ride a bicycle as close as practicable to the right-hand curb or edge of the roadway. (Cal. Veh. Code § 21202(a)).	54019	21202(A)	FAIL RIDE BIKE:RT EDGE RD
Failure to display registration tags or driving with expired registration. (Cal. Veh. Code § 4000).	54099	4000(A)	NO REG:VEH/TRAILER/ETC
Failure to illuminate license plate. (Cal. Veh. Code § 24601).	54110	24601	FAIL MAINT LIC PLATE LAMP
Failure to signal while turning or changing lanes, unless the failure creates a condition that substantially increases the likelihood of injury or death. (Cal. Veh. Code §§ 22107, 22108).	54115	22107	UNSAF TURN &/OR NO SIGNAL

Crossing the street outside of the crosswalk, unless it creates a condition that substantially increases the likelihood of injury or death (Cal. Veh. Code § 21955).	54145	21955	JAYWALKING
Failure to signal while turning or changing lanes, unless the failure creates a condition that substantially increases the likelihood of injury or death. (Cal. Veh. Code §§ 22107, 22108).	54149	22108	FAIL SIGNAL B/4 TURN VEH
Littering, unless an object is thrown from a vehicle in a manner that creates a condition that substantially increases the likelihood of injury or death. (Cal. Veh. Code § 23112).	54163	23112	TOSS/ETC MATTER:HWY/ETC
Driving without functioning or illuminated taillights, unless no taillights are functioning or illuminated and the sun has set. (Cal. Veh. Code § 24600).	54193	24600	TAILLAMP VIOLATIONS
Driving without functioning or illuminated brake lights, unless no brake lights are functioning or illuminated and the sun has set. (Cal. Veh. Code § 24603).	54194	24603	STOPLAMP VIOLATIONS
Improperly mounted license plate. (Cal. Veh. Code § 5201(a)).	54234	5201(A)	LICENS PLATE POSITION VIO
Failure to display registration tags or driving with expired registration. (Cal. Veh. Code § 4000).	54359	4000.1	REG/ETC:SMOG CERTS VIOL
Making a U-turn from the far left-hand lane where the driver can see clearly for 200 feet in either direction, and the maneuver is executed in a manner that does not substantially	54409	22100.5	WRONG LANE UTURN VIOL

increase the likelihood of injury or death. (Cal. Veh. Code § 22100.5).			
Failure to display registration tags or driving with expired registration. (Cal. Veh. Code § 4000).	54412	4000.2	O-O-S VEH:NO REG/SMOG CRT
Failure to display registration tags or driving with expired registration. (Cal. Veh. Code § 4000).	54473	4000.4(A)	UNREG CA BASED VEHICLE
Objects affixed to windows or hanging from rearview mirror. (Cal. Veh. Code § 26708(a)(1)-(2)).	54571	26708(A)(1)	OPR VEH:WINDOW OBSTRUCTED
Objects affixed to windows or hanging from rearview mirror. (Cal. Veh. Code § 26708(a)(1)-(2)).	54614	26708(A)(2)	OPR VEH:WINDOW OBSTRUCTED
1. Failure to display both license plates. (Cal. Veh. Code § 5200(a)).	54644	5200(A)	DISPLAY LIC PLATES WRONG
Failure to display registration tags or driving with expired registration. (Cal. Veh. Code § 4000).	54657	4000(A)(1)	NO REG:VEH/TRAILER/ETC
Failure to display registration tags or driving with expired registration. (Cal. Veh. Code § 4000).	54666	4000.6	UNREG COMM MTR VEH 10000+
Any parking infraction, unless the car is unoccupied.		Multiple	
Sleeping in car. (S.F. Trans. Code § 97)		SFTC 97	
Riding a bicycle on a sidewalk. (S.F. Trans. Code Art. 7, § 7.2.12).		SFTC 7.1.12	

Riding a non-motorized scooter on a sidewalk. (S.F. Trans. Code Art. 7, § 7.2.13).		SFTC 7.2.13

SWITRS and the Not At Fault Driver Methodology

Race/Ethnicity for Not At Fault (NAF) Drivers is used as a comparable baseline of individuals driving in San Francisco. NAF drivers in the data are a random sample of drivers in San Francisco that is representative of the driving population in San Francisco as a whole. To be included as a not at fault driver is a random event, as generally speaking, no persons sign up to be in collisions serious enough to warrant a CHP 555 report. This allows for a more accurate representation of driving individuals in any analytical denominator by leveraging that random sample of drivers who are not at fault in a collision and using that sample as a baseline for comparison purposes.

To compare SWITRS NAF driver race/ethnicity to SDCS race/ethnicity, we utilize the below tables to consolidate race/ethnicity categories into the below consolidated categories. The 'not reported' bucket from SWITRS is dropped from the analysis. Consolidation of SDCS Race/Ethnicity Data moves Pacific Islander into the Asian category and creates an Other category that captures the Middle Eastern or South Asian and Native American categories, along with all entries that have more than one datapoint (White + Asian, for example.)

SDCS Categories	QADR Consolidated Categories
Asian	Asian (+Pacific Islander)
Black/African American	Black/African American
Hispanic/Latino(a)	Hispanic/Latino(a)
Middle Eastern or South Asian	White
Native American	Other (Middle Eastern or South Asian and Native American & all combinations)
Pacific Islander	
White	

SWITRS Categories	QADR Analysis Consolidated Categories
Asian	Asian
Black	Black/African American
Hispanic	Hispanic/Latino(a)
Other	White
White	Other
Not Reported	

Caveats

The level of discretion available to officers to make stops is not captured with any granularity in these data. That is, multiple types of ‘not call for service’ stops (on view or self-initiated activity by an officer) can place less discretion upon an officer in certain circumstances. For example, intelligence led stops (or ‘be on the lookout’ informed stops) are not able to be disaggregated from the data at this time. Directed enforcement operations are also not able to be disaggregated from the data.

Where used, SDCS stops data is perceived demographic data recorded by officers, not self-reported by individuals stopped.

Use of SWITRS Not at Fault data assumes that representation in the NAF data is randomly distributed across racial/ethnic groups. Differing trends in driving habits, age and maintenance level of vehicles, maintenance level of roads where collisions occur, and other factors, may skew the data towards one race/ethnic group or another.
